Ex. 5 Deliberative Process (DP)

“At most, the required Annual Mining Plan provisions on "planned mine progression, location of infrastructure, and capital project locations" might be construed as decisions on "the construction or modification of equipment that will result in emissions," see Meadowbrook Guidance at 9, but the LSA does not provide for any review of how the Mine will meet its environmental obligations for those projects. See LSA 5.2.2(b)(i). Moreover, Otter Tail does not have authority over the manner in which Mine emission units operate; the operation of pollution controls (which, for mining activities, largely consists of dust suppression practices); or monitoring, testing, recordkeeping, or reporting.”

Thanks for sharing Patrick, it looks good to me. I added two comment bubbles with some minor thoughts.

Subject: Briefing paper for ND Coyote Station issue

Hi all,

Gail asked me to put together a briefing paper for Carl; he wants another internal call before we all talk with ND. Here is what I've put together so far, based off of Matt's email responses to ND's latest draft source determination and RTC and some of our previous documents. Please weigh in with edits/comments when you get a chance.
